(54) Title: INSULATING PANEL FOR THERMAL EXPANSION COMPENSATION

WO 2004/053249 A1

(57) Abstract: The invention consists of a panel comprising an insulating core (10) and two outer faces (2, 3) made of metallic sheet and disposed on opposite sides with respect thereto, wherein a cushion (12) of mineral wool is arranged between one of the outer faces and the insulating core. In this way a panel is obtained which is capable of compensating for the thermal expansion of the sheet metal, especially in the case of fire.
